EDUCATION

BS Computer Science   2015 – present
Adamson University   Manila, Philippines

SKILLS

Programming Languages
* Very proficient in Python
* Knowledgeable in Java, C++, HTML/CSS/JS

Databases
SQL, MongoDB

General Skills
* Able to learn new frameworks/workflows/ languages easily and quickly
* Critical thinker
* Loves to find solutions to complex problems.

AWARDS

UP ACM Algolympics 8th Place Team   2021
An algorithm focused programming competition hosted by the University Of The Philippines.

Emerson Innovation Challenge 2018   2018
Our group comprising of Computer Science and IT students represented Adamson University.

PROJECTS

Neon Fire
School Project
A neon themed, Rougelike, bullet hell, space shooter game. Made with the Godot Engine

YAPAMA (Yet Another Password Manager)
An android app that manages, generates, and encrypts passwords and stores them either locally, via GDrive, via Git Repos, or via Remote File Storage!

INTERESTS

Electronics (I like programming and working on micro-controllers like the Arduino, ESP 32, or Rasberry Pis, to make simple IOT devices.)

Game Development (I've been making games as an interest ever since I started programming. Starting with libraries like LibGDX and pygame; To Engines like Godot or Unity)
